INTRODUCTION

This second bulletin of North Carolina morbidity statistics, covering the calendar year 1933, is issued as of February 15, 1934, a promptitude which it is hoped will make it still useful in dealing with the epidemics of the present winter. The order of presentation of tables follows the same sequence as in the previous report. There are also two very important additions: first, tabulations of incidence by color, age and sex groups for the State as a whole for the five years 1929 to 1933; and secondly, a tabulation of the incidence of tuberculosis by county for the year 1933. Similar tabulations of tuberculosis incidence for previous years could not be made, due to partial destruction of records.

The color, age and sex tables have been prepared to cover a five-year period, and can serve as a basis for future comparisons both as to completeness of reporting as well as to group incidence. That morbidity reports are far from complete is evident to all who have to use them. However, these group tabulations on a State-wide basis are quite useful in indicating trends in the several epidemic and endemic diseases. For example, in 1933 the case rate of reported syphilis in the Negro was ten times the white rate, a result probably including both a higher actual incidence and a higher reporting average.

Measles is seen to be most prevalent in the groups in the first few years of school attendance. Diphtheria, on the contrary, is predominantly a preschool disease, and the reported deaths also emphasize this point. The foredoomed failure of any program of diphtheria control through immunization based on work with school children alone is very evident; and it is clearly indicated that this program should be concentrated in the preschool group. Reported pellagra incidence shows a prevalence in females nearly three times the male rate, whether in the white or black race, and with the rate in the two races approximately the same. Other interesting points will become evident with a little study of these tables.

With the evident incompleteness of morbidity reports the need for caution in making comparisons between different areas is again emphasized. Such comparisons should be made only when all the factors involved are taken into consideration. With this reservation ever in mind, we believe the statistics contained in these two reports can be of great value in epidemiological investigations throughout North Carolina.

INTRODUCTION

This second edition of the book contains a number of changes and additions since the first edition was published in 1955. It is hoped that it will be found useful to a wider circle of students and teachers. The book is written for those who are interested in the history of the world, and who wish to know more about the events which have shaped the world as we know it. It is written in a simple and straightforward manner, and it is hoped that it will be found useful to a wide circle of students and teachers. The book is written for those who are interested in the history of the world, and who wish to know more about the events which have shaped the world as we know it.

TABLE OF CONTENTS

Second Morbidity Report North Carolina

Table I.	Reported cases for the State as a whole of 32 reportable diseases, by month, 1933	Page 1
Table II.	Reported cases for each of eleven cities of 11 major reportable diseases, by month, 1933	Pages 2-4
Table III.	Reported cases, 1933, by county, by month, for 12 major reportable diseases:	
	Chicken Pox - pages 5-6	Poliomyelitis - page 8
	Diphtheria - 7-8	Scarlet Fever - 15-16
	German Measles - 9	Smallpox - 6
	Measles - 10-11	Tuberculosis - 17-18
	Meningitis - 12	Typhoid Fever - 19-20
	Pellagra - 13-14	Whooping Cough - 21-22
Table IV.	Reported cases, by county, 1933, for the 20 reportable diseases not included in Tables II and III above (see list Table V)	Pgs. 23-24
Table V.	Reported cases for years 1918-1932, by county, for the 19 reportable diseases not included in Tables II and III above	Pgs. 28-42
	Anthrax - page 33	Plague - page 34
	Chancroid - 37-38	Rabies - 33
	Cholera - 34	Rocky Mtn. Sp. Fev. - 33
	Dysentery - 28	Sep. Sore Throat - 31-32
	End. Typhus - 34	Syphilis - 39-40
	Gonorrhea - 35-36	Trachoma - 33
	Influenza - 29-30	Tularemia - 34
	Ophthalmia Neon. - 41-42	Typhus (Eur.) - 34
	ParaTyphoid Fev. - 28	Undulant Fever - 33
		Yellow Fever - 34
Table VI.	Reported cases of 31 communicable diseases by age, by years, 1929-1933	Pages 43-47
	1929 - page 47	1930 - page 46
	1931 - 45	1932 - 44
		1933 - 43
Table VII.	Reported cases of 31 communicable diseases, by race and sex, by years, 1929-1933	pages 48-52
	1929 - page 52	1930 - page 51
	1931 - 50	1932 - 49
		1933 - 48

THE HISTORY OF THE UNITED STATES

CHAPTER I
THE DISCOVERY OF AMERICA
In the year 1492, Christopher Columbus, an Italian navigator, sailed from Spain in search of a westward route to the Indies. He discovered the continent of America on October 12, 1492. The discovery of America opened up a new world of trade and exploration for Europe.

CHAPTER II
THE EARLY SETTLEMENTS
The first European settlers in America were the Spaniards, who established colonies in the West Indies and along the coast of Central and South America. The English followed, establishing colonies in the North America.

CHAPTER III
THE STRUGGLE FOR INDEPENDENCE
The American colonies fought for independence from British rule. The American Revolution began in 1775 and ended in 1783. The United States Declaration of Independence was signed on July 4, 1776.

CHAPTER IV
THE CONSTITUTION
The United States Constitution was drafted in 1787 and ratified in 1788. It established the framework of the federal government and the rights of the states.

CHAPTER V
THE CIVIL WAR
The American Civil War was fought between the Union and the Confederacy from 1861 to 1865. It was a struggle over the issue of slavery.

CHAPTER VI
THE RECONSTRUCTION
The Reconstruction period followed the Civil War, from 1865 to 1877. It was a time of rebuilding the South and integrating the freed slaves into society.

CHAPTER VII
THE GROWTH OF THE UNITED STATES
The United States expanded its territory through the Louisiana Purchase and the Mexican-American War. The country grew from a small colony to a great nation.

CHAPTER VIII
THE INDUSTRIAL REVOLUTION
The Industrial Revolution transformed the United States from an agrarian society to an industrial power. It brought about significant changes in the economy and society.

CHAPTER IX
THE WESTERN EXPANSION
The Western Expansion was a period of exploration and settlement in the western United States. It led to the discovery of gold and the establishment of new territories.

CHAPTER X
THE TURN OF THE CENTURY
The turn of the century was a time of progress and reform. It saw the rise of the Progressive Movement and the establishment of the Federal Reserve.

THE HISTORY OF THE UNITED STATES
Continued in the next volume.
